Tap and Sing!

This is no ordinary tap class! The young students in this joy-filled class will learn to "sell the song" as well as the "tap break" *within* the song!

In addition to being just plain FUN, tap dancing is ideal for developing flexibility and strength in hips, legs, knees, ankles, and feet. It's a fundamental musical theater skill.

This class teaches rhythm, focus, musicality, creative expression, and coordination. The class features an introduction to tap fundamentals and terminology. Students with some tap background will be taught how to hone their existing skills. No previous tap experience necessary!

The class concludes with a performance at our Fall Recital!
